

### Sprint Goal:

Get a basic AR app working where the user can scan a real object and a virtual item.  
And have a basic backend implementation to let the users create accounts.

### Team Capacities:

Nick Jackoski: 16 hours

- Base Capacity: is 14 hours.
- Not a ton of assignments this week so I have extra time this sprint.

Anas Matar: 8 hours

- Base Capacity: is 15 hours.
- The satellite is taking a lot of time and effort this week.

Kamil Yousuf

- Base Capacity: 12 hours
- Some assignments and research but overall manageable

### Planned User Stories:

1. [US1-Scan-to-Get-AR-Item](#)
2. [US6-create-an-account](#)
